revised 19 Oct 2012

Addressing JCIDS Criticism

Major Criticisms of the JCIDS Process:

- Solution development and delivery are not timely
- Decisions are made late to need or with poorly scoped information
- Process is complex, cumbersome and too documentcentric
- Lacks mechanisms to focus review across portfolios
- Does not control "requirements creep"
- Does not include key customers (Combatant Commands (CCMDs)) in the decision process
- Does not have tracking mechanisms to trace developments from gap identification through solution fielding

Law and Policy

- Title 10 Responsibilities (as modified by 2009 Weapon System Acquisition Reform Act and 2011 National Defense Authorization Act)
 - The Joint Requirements Oversight Council (JROC) shall assist the Vice Chairman, Joint Chiefs of Staff (VCJCS)...
 - In making cost, schedule, and performance trades
 - In prioritizing joint military requirements
 - The JROC must...
 - Consider input from Combatant Commanders on joint requirements
 - Consider cost, schedule and performance tradeoffs in establishing requirements
 - Set an Initial Operational Capability (IOC) schedule objective for each requirement
- All the Above Emphasized in the JROC Charter (CJCSI 5123 series)
- More Than Any Other Body, ome charts have additional information in notes pages

What Has Happened in the Past

- Construct Ineffective; Does Not Encourage/Promote Incisive Questions/Discussions
 - Little consideration of cost/schedule/performance tradeoffs No prioritization within and across portfolios...little to no risk analysis
 - Document and process intensive -- bureaucratic and time consuming
 - Little impact on shaping the force
- Congressional Question for the Record (Gen Dempsey Confirmation Hearing)
 - "General Dempsey, what's the remedy for Admiral Mullen's belief that DoD has 'lost the ability to prioritize, to make hard decisions, to do tough analysis, to make trades'?"
- JROC Criticisms (Defense Science Board, Defense Business Board, Government Accountability Office,...)

ome charts have additional information in notes pages

Take the Lead in Shaping the Force:

- Debate the difficult issues and make difficult choices <u>earlier</u>
- Better upfront fidelity on cost/schedule/performance tradeoffs
- More <u>analytic</u> rigor and risk/portfolio analysis
- Stronger emphasis on <u>prioritizing</u> requirements/ capabilities
- More dynamic/iterative process throughout a program's <u>lifecycle</u>. (Revisit as necessary... strategy shifts, threat changes, etc.)

Create a More Dynamic and Iterative Process...

Of the Charts have addition Make Difficult Choices Throughout the

How We are Getting There

 <u>Limit the Audience</u> so Determinative Discussion/ Decisions can be Made

More Tank-like

JROC Principals+1, Combatant Command (CCMD) Principals+1 Statutory Advisors or their Deputy:

 Under Secretary of Defense (Acquisition, Technology & Logistics) (USD(AT&L), Under Secretary (Policy) (USD(P), Under Secretary (Comptroller) (USD(C), Director, Cost Assessment & Program Evaluation (CAPE), and Director, Operational Test & Evaluation (DOT&E)

Joint Staff J-7

Functional Capability Board (FCB) Chair Minimal others by invitation only...

 Cost vs. Capability vs. Risk – Better Upfront Analysis of Alternatives

FCB Review of Analysis of Alternatives (AoA) prior to Milestone A Highlight non-materiel approaches as alternative or in conjunction with materiel solutions

Tee up the appropriate debate

Tougher decisions on the 80% solution (i.e. knee in the curve)

Recent Changes to JCIDS

 Consolidated Four Instructions Into Two and JCIDS Manual

CJCSI 5123 (JROC Charter) and CJCSI 3170 (JCIDS), 10 Jan 2012

JCIDS Manual, 19 Jan 2012

Cancelled: CJCSI 3137 (FCBs) and CJCSI 3470 (JUONs)

 Adjusted JROC Venue to be More Tank-like with FCBs Briefing Issues and Providing Portfolio-Level Assessment

Incorporated SAP Aspects into the discussion

- Requires FCB Joint Prioritization of all Capability Requirements Within Their Portfolio
- Stand Up of the SAP Integration Group to

Recent Changes to JCIDS (Con't)

- Validation Decision Considers Cost, Schedule, Performance and Quantity Targets in JROC Memoranda (JROCMs) as Appropriate with Expanded Tripwire Process
- Clarified the Ability of the JROC to Call for a Review of Previously Validated Requirements/Programs
- Mandated Shorter Document Lengths
- Applied "Information Technology Box" (IT Box) Construct to Initial Capabilities Documents (ICDs) – Information System (IS) ICD, to Allow Greater Flexibility and Response to Evolving Technologies
- Require Studies Notification and Repository
- Use of Capability Development Tracking & Management (CDTM) Tool for Document Generation (exceptions: Information Systems Initial Capabilities Document (ICD), Urgent Operational Needs documents, and above SECRET documents).

Recent Changes to JCIDS (Con't)

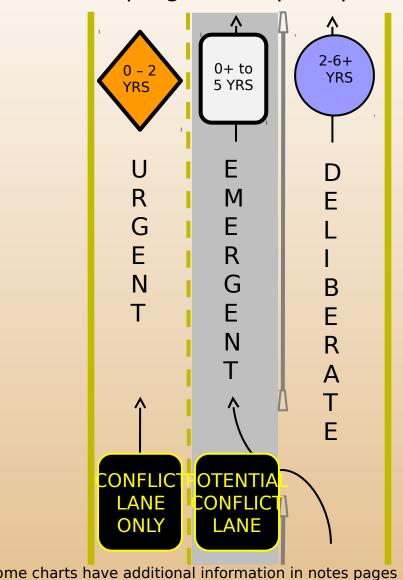

- Incorporates Pre-Milestone A Review of AoA Results in Support of Providing Cost/Schedule/Performance Recommendations to the Milestone Decision Authority (MDA)
- Requires Draft Capability Development Document (CDD) (Component-Level; Not Submitted to Joint Staff) to Support Technology Development Phase
- Greater J-7 Role to Emphasize Non-Materiel Solutions and Considerations to Capability Gaps
- Streamlines Joint Staff Procedures and Timelines by 50% to Increase Effectiveness and Responsiveness of the Requirements Development Process
- Provides Three Lanes to Requirements Development to Respond to Capability Gaps within Acceptable Timeframes and Risks...Deliberate, Urgent, and Emergent

ome charts Altermate in Document Formats Approved by J-8 in July 2012

Three Requirements "Lanes"

"Keep right, except to pass"

Deliberate Requirements

- Service, CCMD or Agency Driven
- Traditional route for capabilities that require significant tech development and/or are not urgent or compelling in nature

Emergent Requirements

- CCMD Driven
- Supports accelerated acquisition of capabilities needed for an anticipated or pending contingency operation
- VCJCS verifies, JCB or JROC validates

Urgent Requirements

- CCMD Driven
- Urgent and compelling to prevent loss of life and/or mission failure during current operations
- Require little tech development and caդ

Urgent vs. Emergent Situations

Urgent Situations (Joint Urgent Operational Need (JUON))

- Ongoing conflict or crisis
- Failure to act will result in:

Direct enemy-action related loss of life and/or

Critical mission failure

- JUON Validated by J-8, DDR
- Staffing goal of 15 days

Emergent Situations (Joint Emergent Operational Need (JEON))

- Anticipated or pending contingency operation
- Must act before operations commence to avoid:

Enemy-action related loss of life and/or Critical mission failure

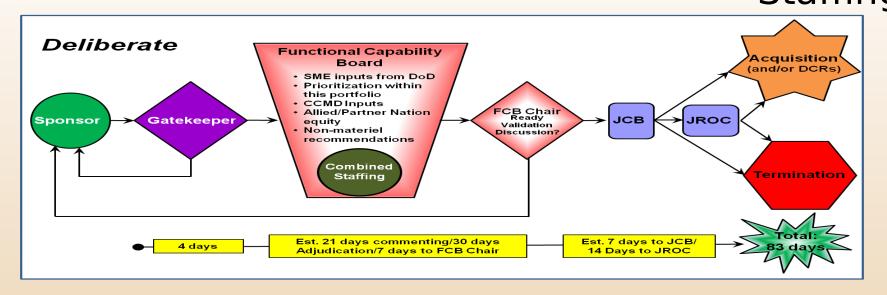

Must be verified by

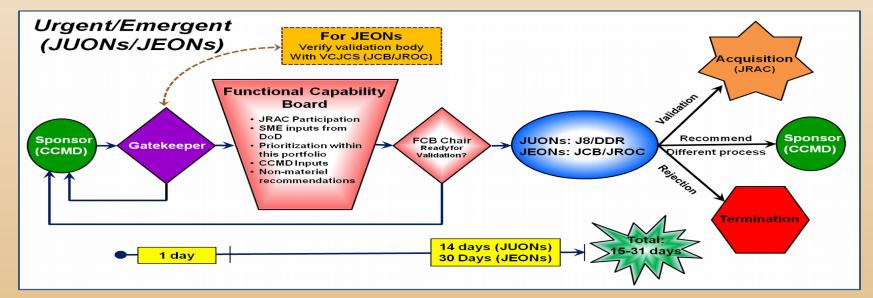

VCIC

ponsors must provide an assessment of operational utility within 90 days of initial fielding (format in JCIDS Manual)

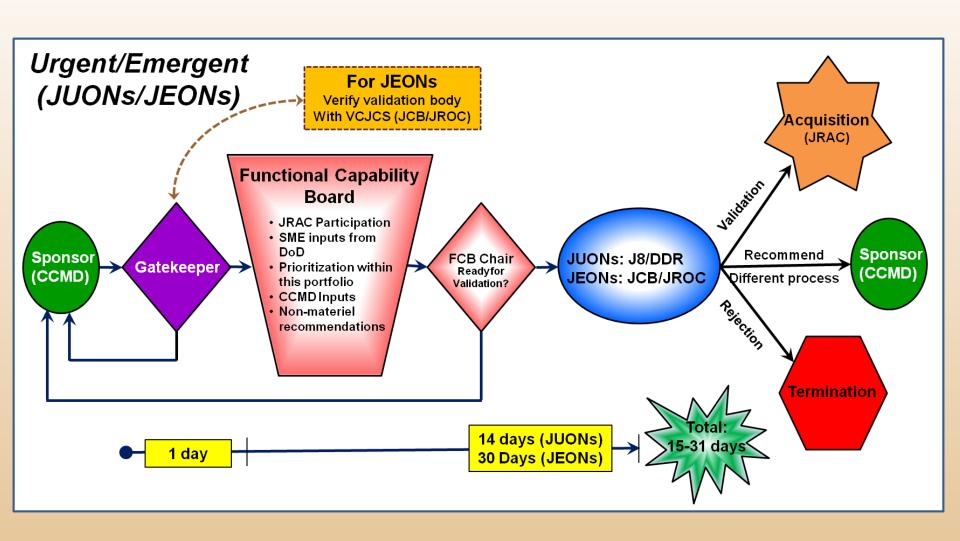

Deliberate and Urgent/Emergent Staffing

Urgent/Emergent Staffing

Joint Prioritization

- Each FCB Will Establish Joint Priorities for all Capability Requirements Submitted for Their Portfolios in ICDs, JEONs, JUONs, or DoD Component UONs
- Successor Documents CDDs, CPDs, and Joint DOTmLPF-P Change Recommendations (Joint DCRs) Do Not Require Additional Prioritization Unless Submitted Without a Preceding ICD
- Joint Priorities are Established During the FCB JCIDS Document Staffing Process
- Sponsor Priorities "will not be considered during FCB assessments of joint priorities"

 DOTmLPF-P: Doctrine, Organization, Training, materiel, Leadership & Education, Personnel

DOTmLPF-P: Doctrine, Organization, Training, materiel, Leadership & Education, Personne Facilities and Policy

JCB/JROC Tripwire

- JROC/JCB Tripwire is a JROC Process Established to Review JROC and JCB Interest Programs That Deviate From Cost, Schedule, or Quantity Targets Established at the Time of Validating CDDs or Capability Production Documents (CPDs).
- Programs Must Return to the JROC or JCB for Revalidation if they Experience:

<u>Cost</u>. Cost growth equal to or greater than 10 percent over their current baseline or 25 percent over their original baseline as defined in the Acquisition Program Baseline (APB).

<u>Schedule</u>. Schedule slip for Initial Operational Capability (IOC) or Full Operational Capability (FOC) equal to or greater than 12 months from IOC and FOC targets set in the validation JROC Memorandum (JROCM).

Quantity. Reduction in end-item quantities equal to or greater than 10 percent from a quantity target set in the validation JROCM.

Interaction With Other Processes

•JCIDS Manual Describes JCIDS Interaction with the Following Processes.

Integrated Priority Lists (IPLs)/Capability Gap Assessment (CGA)

JROC/JCB Tripwire

Nunn-McCurdy Cost Breaches

Major Automated Information System (MAIS) Critical Change Reports

Program and Budget Review

Chairman's Program Recommendation/Assessment

Chairman's Risk Assessment

Capability Portfolio Management

 Post-Validation Processes and Interactions are Summarized for Each Phase of the Acquisition

Changes to JCIDS

Documents

- All Additional Net-Ready KPP Architecture Products Required IAW CJCSI 6212.01 & DoDAF 2.0. Link to Architecture Repository for All Except OV-1.
- Page Count Constrained: ICD 10 Pages; DCR 30 Pages;
 CDD 45 Pages; CPD 40 Pages (Page Count Includes
 Appendix A (Operational Viewpoint 1 (OV-1)), Does Not Include Appendix C (Acronym List) and Appendix D

JCIDS Alternate Document Formats

- Reorganization of content within JCIDS documents
 - -Provides better logical flow and reduced redundancies within documents, making it easier to meet document page limits.
 - -Provides better traceability from source of requirements through ICD to successor documents.
 - No content has been removed, so all equities are still addressed without need for official re-staffing.
 - ➤ ICD Format: Sections reduced from seven to five. IS-ICD length and content now same as regular ICD.
 - CDD/CPD Format: Sections reduced from sixteen to twelve. IS-CDD format added.
 - DCR Format: Sections reduced from nine to five.
 - JUON/JEON Format: Sections reduced from thirteen to eight.

General

-Alternate document formats are intended to reorganize/streamline content for interim efficiencies until next JCIDS update.

process of the charts have additional information in notes pages alternate document formation.

Mandatory Key Performance Parameters (KPPs) and Key System Attributes (KSAs)

- Force Protection KPP (all manned systems)
- Survivability KPP (all manned; may be applicable to unmanned)
- Sustainment KPP (all ACAT I

Net-Ready KPP Changes

2008 - 2011

Net-Ready KPP Elements CJCSI 6212.01E, 15 Dec 2008*

- 1. Compliant Solution Architecture
- 2. Compliance with Net-Centric Data & Services Strategies
- 3. Compliance with Applicable Global Information Grid (GIG) Technical Guidance (GTG)
- 4. Compliance with DOD Information Assurance (IA) Requirements
- 5. Compliance with Supportability
 Requirements to Include
 Spectrum Utilization &
 Information Bandwidth
 Requirements, Selective
 Availability Anti-Spoofing Module
 (SAASM) & the Joint Tactical

Net-Ready KPP Attributes JCIDS Mandal, 19 Jan 2012)

- 1. Supports Military Operations
- 2. Is Entered and Managed on the Network, and
- 3. Effectively Exchanges Information

Three-Step Development Process

Step 1. Mission Analysis – Determines Attribute Details for Supports Military Operations

Step 2. Information Analysis –
Determines Attribute Details for
Entered & Managed on the
Network, and Effectively
Exchanges Information

<u>Step 3</u>. Systems Engineering &

orts all 3

Net-Ready KPP Example

Attribute 1. Support to Military Operation

NR-KPP Attribute	Key Performance Parameter	Threshold	Objective
Support to military operations	Mission: Tracking and locating (Finding, Fixing, Finishing) High-Value Target (HVT)		
	Measure: Timely, actionable dissemination of acquisition data for HVT	10 minutes Area denial of	Near-real-time HVT tracked,
	Conditions: Targeting quality data to the neutralizing/ tracking entity	HVT activities	neutralized
	Mission Activities: Find HVT Measure: Location accuracy	100 meter circle	25 meter circle
	Conditions: Individual differentiation	Identify armed/ not armed	Identify individual

Net-Ready KPP Exampl

Attribute 2. Enter and Be Managed in the Networ

NR-KPP Attribute	Key Performance Parameter	Threshol d	Objecti ve
Enter and be managed in the network	Network: SIPRNET Measure: Time to connect to an operational network from power up	2 minutes	1 minute
	Conditions: Network connectivity	99.8	99.9
	Network: NIPRNET Measure: Time to connect to an operational network	2 minutes	1 minute
	from power up Conditions: Network connectivity	99.8	99.9

Net-Ready KPP Example

Attribute 3. Exchange Information

NR-KPP Attribute	Key Performance Parameter	Threshold	Objective
Exchange information	Information Element: Target Data Measure: Dissemination of HVT biographic and physical data Measure: Receipt of HVT data Measure: Latency of data	10 seconds Line of Sight (LOS) 5 seconds NSA certified type 1	5 seconds Beyond LOS 2 seconds NSA certified type 1
	Measure: Strength of encryption Conditions: Tactical/Geopolitical	Permissive environment	Non- permissive environment

Information System (IS) ICD

- IS ICDs Implement the "Information Technology (IT) Box" Model
- IS ICDs are Required When the Solution Requires Research and Development, and Acquisition of Applications with a Projected Software Development Cost of Over \$15 Million
- Not Used for Software Embedded as a Subset of a Capability Solution Developed IAW Other Validated JCIDS Documents
- IS ICD Applies to:

Commercial off the Shelf (COTS)/Government off the Shelf (GOTS) software, and associated hardware without modification

Commercial capability solutions with integrated, DoD-specific performance standards

Additional production or modification of previously developed U.S and/or Allied or interagency systems or equipment

Development, integration, and acquisition of customized

"IT Box" model calls for fewer iterations of validating documents through the JCIDS process by describing the overall IS program in the IS ICD, and delegating validation of detailed follow-on requirement and solution oversight to a flag-level organization other than the JROC or JCB.

Information System (IS)

(Con't)

- CDDs & CPDs are Not Required as Successor Documents for non-MDAP IS; for non-MDAP IS Sponsors Have Management Flexibility for Alternate Documents
- JCIDS Manual Provides Examples of Potential non-MDAP IS ICD Follow-On Documents (Actual Names, Content, and Approval TBD by the Delegated Validation Authority):

Requirements Definition Package (RDP) – identifies KPPs and nonmateriel changes

Capability Drop (CD) – lower level document that specifies the characteristics of a "widget" or "app" for partial deployment of the solution

• FCR is Briefed Every 2nd Year After Validation on Progress
Business IS are not normally subject to JROC Review – However, FCBs have visibility of business case documents posted to KM/DS and if FCB decides the system has "joint equities" can recommend joint oversight.

JCIDS – Major Changes Summary

- Three Processes deliberate, urgent, emergent
- JCIDS Documents ICD, CDD, CPD, DCR page count restricted.
- Information Systems ICD new document supports IT Box; non-MDAP IS do not require CDD/CPD follow-on.
- Cost Tables required for IS ICD, CDD, CPD and DCR.
- **Staffing** streamlined. Deliberate (83 days) & urgent/emergent (15/31 days).
- Role of FCB Strengthened FCB Chair briefs JROC, not the JCIDS Sponsor and not the PM. FCB will review AoA results.
- **Prioritization** new process. FCBs will prioritize capability requirements within their portfolios input from the Sponsor will not be considered.
- **KPPs** six "mandatory" (Force protection, survivability, sustainment, net-ready (major changes), training, and energy). If not used, must justify why not.
- **Draft CDD Required for TD Phase** Component level; not submitted to KM/DS.
- Affordability cost considered in document review and validation
